

PROCEDURE GUIDE

COMMITTEE: WALLSTREET

TH

TISMUN
ANNIVERSARY

WALL STREET:

Author: Samuel Sandoval

INTRODUCTION & DYNAMICS OF THE COMMITTEE:

The chair of the Wall Street committee extends warm greetings to all delegates. We are aware that both academically and procedurally, this committee is rather demanding. For this reason, the chair would like to underline the Crisis Team as a tool to help the committee function as effectively as possible. The chair understands that being a somewhat confusing committee in terms of its operation, doubts may arise before or during the model, which is why the chair invites the delegates to contact any member of the team.

INTRODUCTION TO THE COMMITTEE:

This committee will be inspired by the real-life Wall Street. Wall Street is a street located in the financial district of New York, home to the largest stock exchange in terms of market capitalization. Delegates will be simulating to partake in this stock market, with each of them representing a different company. The committee will tackle two real-life topics. Topic A will be based around

the 2008 financial crisis. Even though the committee will be tackling this historical issue, it is imperative that delegates promote their creativity to formulate their own solutions towards this crisis, seeking to stipulate innovative resolutions at all times. On the other hand, Topic B will be discussing the rise of blockchain - a type of technology present in our world. Once again, it is expected for delegates to navigate their own solutions through their creativity in order to take advantage of this non-fictional mechanism.

DYNAMICS OF THE COMMITTEE:

The Crisis Center will be strictly involved with the development and growth of this committee. Directives are imperative for the functioning of this committee as this will allow delegates not only to take strategic decisions -especially when blockchain is at hands- but will also be the means by which delegates will be able to acquire or sell stocks. In order to do so, the Crisis Center will count with a program that will be mocking and illustrating the stock market, visually representing the stocks bought or sold by the delegates. This will allow delegates to sell and buy stocks from 50 different companies. It is imperative that directives are as specific and achievable as possible, answering what, how, why, when

and where at all times. For more information on directives, please check the section *Directives*. The Crisis Center will be updating the current state of the stock market after every significant update, showing the stocks that delegates will be able to buy or sell via directives. Please note that many other factors will be taken into account to monitor the stock market, such as inflation - and of course: the financial crisis of 2008 present during the events of topic A. Delegates will be representing different companies that participate in the stock market, and must make an appropriate use of their delegation. Each delegation will clearly count with a specific budget that the crisis center will specify to the delegates. It is worth highlighting that delegates must use their financial resources wisely, especially when a financial crisis like this is taking place.

OBJECTIVE OF THE COMMITTEE:

Delegates should be able to appropriately represent each of their delegations, taking the financial prosperity of their assigned companies as prime objective throughout the committee. Delegates must make smart strategic and financial decisions that will allow their companies to thrive -even under a financial crisis-.

OPERATIONAL MECHANISMS

The Chair:

The Chair is the entity that holds the greatest authority within the committee; it holds the responsibility for directing the process laid out in the guide, submitting the various motions to a vote, and acting as a "guide" for the delegates during debate and other times of discussion.

Crisis Center:

The Crisis Center's three main responsibilities are to examine, approve, or refuse committee delegate-submitted directives and to communicate the effects of these through crisis writing or committee status updates. If it is deemed necessary, the crisis center will also attempt to maintain the committee flowing through difficulties even if they are not a direct result of a crisis.

Delegates:

Delegates must comply with their role inside the committee, handling the case with the respect that it deserves. Delegates are expected to have an encouraging attitude, with the mere objective of finding solutions and declaring as guilty those who have committed unlawful acts towards the

case. The role of directives plays an essential role throughout the committee. Delegates are required to make use of directives, complying with the specific parameters that emerge through them. Lastly, delegates must make an appropriate representation of their delegation, along with the new motions added within the structure of the committee.

TRADITIONAL MOTIONS & POINTS

This committee will count with traditional motions and points. They are as follows:

Motions:

- Motion to open session
- Motion to suspend session
- Motion to resume session
- Motion to close session
- Motion to open agenda
- Motion to close agenda
- Motion to start a moderated caucus
- Motion to start an unmoderated caucus
- Motion to start a speakers list
- Motion to extend time for (....)
- Motion to read working paper (.....)
- Motion to vote working paper (.....)
- Motion to table working paper
- Motion to add to the register
- Motion to divide question

- Motion for an extraordinary session of questions
- Motion to relax dress code
- Motion to divide the house
- Consultation of a whole

Points:

- Point of order
- Point of personal privilege
- Point of information to the chair
- Point of veracity
- Point of relevance
- Right to reply
- Permission to cite
- Point of parliamentary inquiry
- Point of commentary

DIRECTIVES

Directives are the means by which delegates can take actions in a committee. In order to send a directive, delegates must fill the format annexed further below. Take in mind that a directive can be approved or denied by the crisis center depending if the directive is specific and relevant enough. The directive must be answering the questions of who, when, where, how, and why in detail, and must be relevant to the committee in terms of realism, pertinence, and context.

Nature of a directive:

Directives can be either public or private.

- Public directives: Public directives are a kind of directive that will be read to the entire committee out loud, as it is written.
- Private directives: Private directives on the other hand will not be read to the public, and instead be kept private between the delegate and the crisis center only. In order for the directive to be private, an encryption method must be used. This is further explained below.

Encryption Methods:

All private directives must be encrypted in order to be kept a secret. The 2 most common and recommended types of encryption methods are:

1. Morse code: Type of encryption method invented Samuel F.B. Morse during the 1830s, consisting of an alphabet represented by long and short sound signals.
2. Pigpen Cipher: Type of encryption method developed by Freemasons in the 18th century. Consists in symbols that represent letters in an alphabetical grid.

Feel free to use any other encryption method after consulting if it's pertinent to your crisis center. You may also create your own encryption method through a directive, but it must be specific and relevant for it to be approved, which is why consultation with the crisis center will always be recommended.

Types of directives:

Economic Directive: Type of directive used when the actions will affect the economy or financial stability of a delegation or the committee as a whole. Delegates will be able to make all of their financial moves regarding stocks through this type of directive.

Strategic Directive: Type of directive used when the delegation plans to develop a strategy to benefit themselves or their allies. Specify when, where, how in detail. Delegates will be able to make strategic moves through this type of directive.

Directives Format:

This format will be present in a Google Forms which the Crisis Center will pass to the delegates.

Delegation: Name of the delegation writing the directive.

Date: Select the date the committee is currently set in (The crisis center will track the date at all times on a board).

Nature: Select whether the directive is public or private.

Directive Type: Select type of directive.

Encryption Method: State the encryption method used (only if the directive is private).

Preamble: State the context, explaining what led to the creation of such a directive.

Actions: The most important part of the directive. In here the actions must be explained in DETAIL in a story-telling-like manner, you must always answer who, when, where, how, and why. Be as specific as possible.

Desired objective: The aim of the directive must be outlined: What does your delegation expect to do with this directive?

Example:

[Directive Example](#)

PRESS RELEASE

A press release is similar to a public directive in the sense that it will be read to the whole committee. A press release is a statement issued to a newspaper surrounding a topic in particular. The press release must include the date it was published, the newspaper (must be coherent with the delegation), and the main body in which the actions will be narrated. Once again remember to be as specific as possible, answering what, where, when, how, and why.

Press release format:

Delegation: Name of the delegation writing the press release.

Date: Select the date the committee is currently set in (The crisis center will track the date at all times on a board).

Preamble: State the context, explaining what led to the creation of such a press release.

Actions: This is the part where you have to write the press release in detail, as specific as possible, answering what, where, when,

how, and why. Remember to add the name of the newspaper and date of publication, as a real press release would. (Take a look at the example attached below for inspiration in format).

Desired objective: The aim of the press release must be outlined: What does your delegation expect to do with this directive?

Example:

[Press Release Example](#)

PORTFOLIO POWER

A portfolio power is the way a delegation can ask the crisis center for specifics on the resources available for their own delegation, or any other in the committee (eg. financially, politically, etc). You must be as specific and concise as possible on why the delegation is sending the portfolio power and what exactly it is seeking.

Portfolio Power Format:

Delegation: Name of the delegation requesting the portfolio power.

Date: Select the date the committee is currently set in (The crisis center will track the date at all times on a board).

Preamble: State the context, explaining what's leading the delegation to request a portfolio power.

Actions: This is the part where you have to request the portfolio power, mentioning who's resources you wish to inquire about, and be as specific as possible on exactly which resources you wish to learn about.

Desired objective: The aim of the portfolio power must be outlined: What does your delegation expect to do with this information of the resources?
